**ART IN EVERY  
FRAME**

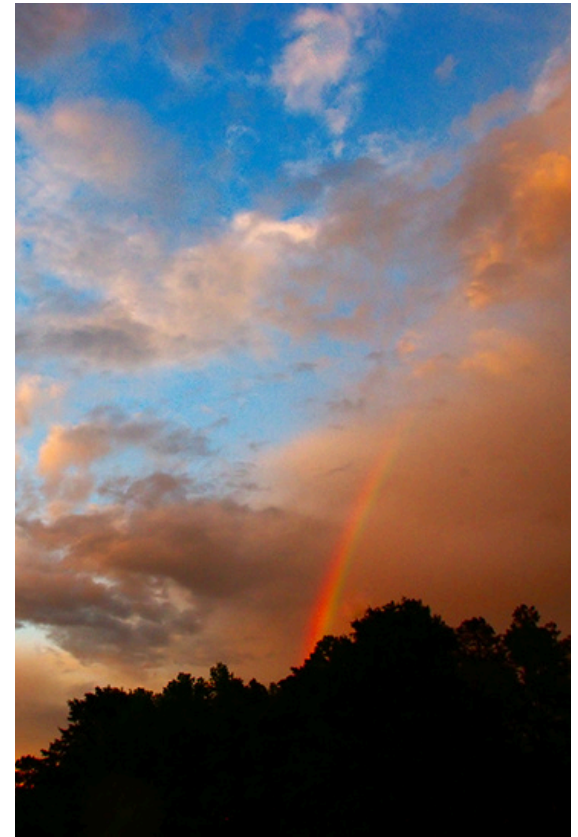

Dramatic skies. Southern light. Timeless landscapes.

Heather Kitchen captures the fleeting moments when light and place align — creating photographs that are as much fine art as memory.

# SKIES & STORMS

The South Carolina sky is never still.

Storm fronts rise. They dissolve in minutes. Light shifts into something unforgettable.

Unrepeatable. Alive. Untamed.

# LIGHTHOUSES

From the Great Lakes to the Carolina coast.

Guardians against tide, symbols of light.

Sacred silhouettes. History resting in light.

Solitude framed.  
Quiet corners made luminous.

Strength in lines.  
Resilience in structure.

Photography that carries memory.  
Light, and place.  
Into every frame.

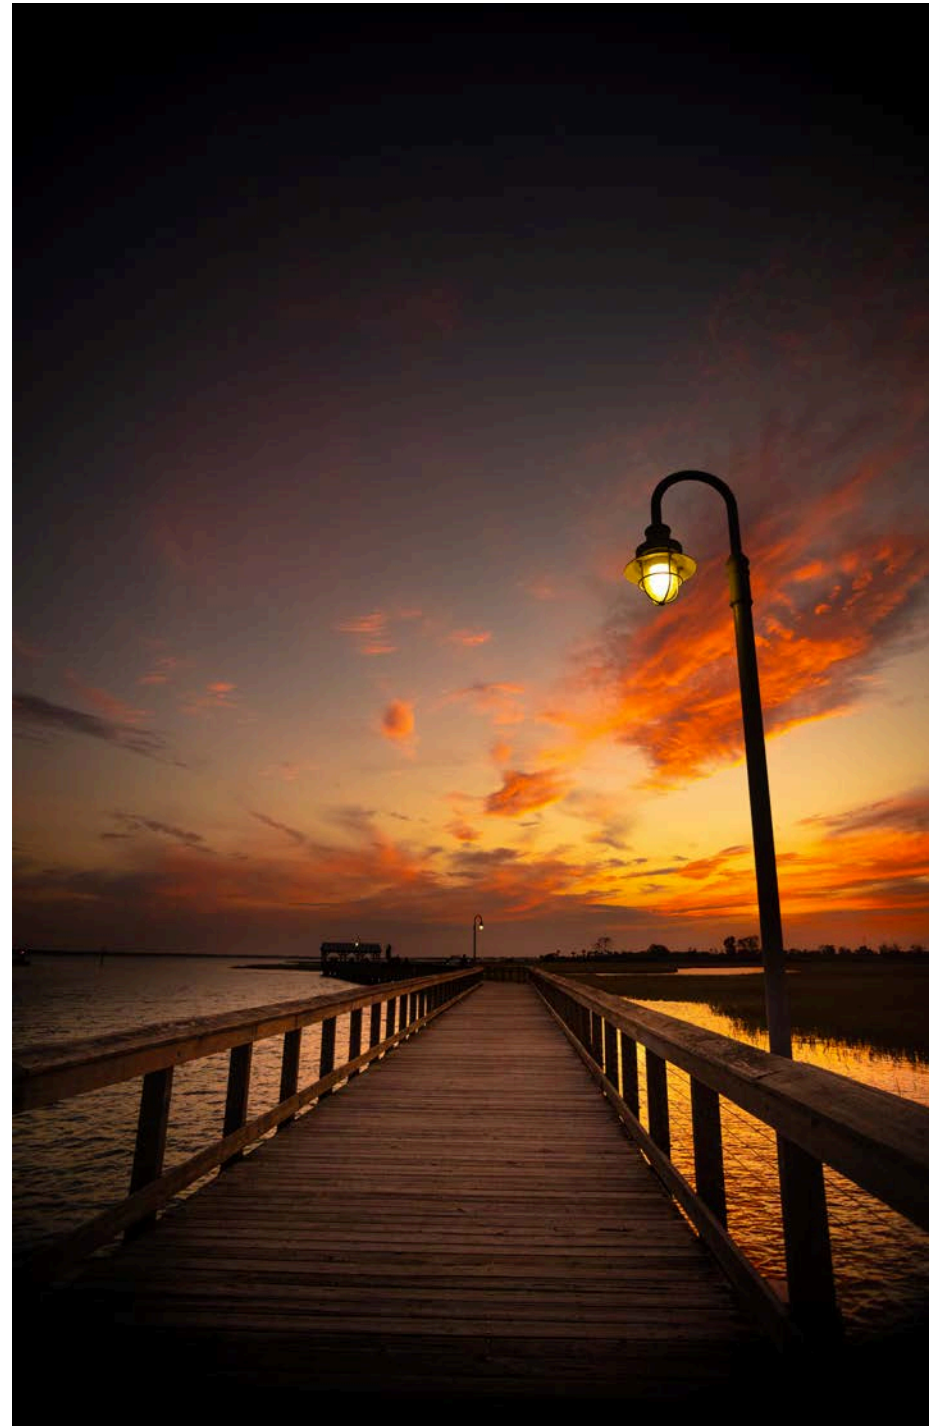

Each image is a record of what endures —  
storms that shift in minutes, ruins that stand  
for centuries, and the light that binds them  
together.

Bring these moments into your space.

This catalog is a glimpse into the light and  
landscapes that shape my work. Each piece is  
created to endure — to hold memory, place,  
and meaning. I invite you to explore, collect,  
or commission the work that speaks to your  
story.
